

Section 1:

- Begin progressing on “backlog” items on Trello.
- Begin tasks under to-do list which have not been completed
- Continue progressing on items under “doing”

Section 2:

I learned more about software development practices such as wire framing. Wireframing is a simple way to visualize the look of web pages and how content interacts with other pages. I worked on wireframing on our product in order to get an idea of how webpages will interact and look.

Section 3:

- Work with team to figure out who will do what on the storyboard to-do list
- Begin work on “backlog items” on storyboard
- Finish up work on items under the “doing” section, communicate with the team about next steps of development.
